Wall Mounted Traverse

Price Guide July 2012

Using this price guide

Measure the length of the available wall space.
Compare the wall styles and decide which best suits your requirements and budget.
Add the cost of your chosen safety surface to find the total project cost.

Please note: The prices shown are intended as a guide, and may vary depending on factors such as your distance from us and any specific requirements that you may have.
Please contact us to discuss your project and we can provide a formal quote.

Prices are exclusive of VAT

Natural Timber Panels with volumes

We install an attractive natural timber surface across the whole wall area, to which we can attach climbing holds and some larger 3D shapes (volumes). The surface is fully pressure treated for a long lifespan.

This is a versatile system that provides a varied climbing experience with plenty of scope for expansion. The wall height is important with a panelled wall, unlike the other wall styles, as this will determine the amount of timber panelling.

Holds direct to wall

Sockets are bonded permanently into the wall using resin, to which the holds are attached.

This is an extremely durable, low maintenance system that is best installed onto walls where the bricks/blocks are visible and there is no plaster or other surface materials. Stainless sockets are recommended for outdoor walls.

Holds direct to wall

(Budget Version)

Expansion sockets are placed in the wall, to which the holds are attached.

This inexpensive system may require occasional replacement of sockets. This is best installed onto walls where the bricks/blocks are visible and there is no plaster or other surface materials.

Rubber Crumb

For tarmac or concrete surfaces choose rubber crumb surfacing. The surfacing is bonded to the ground and features ramped edging to reduce any trip hazard. A red safety line can be painted if required.

Grass Matting

Grass matting allows you to keep the grass under the climbing wall. It lets the grass grow through whilst providing a soft landing for climbers hopping off the wall.

Length of Wall

Length of Wall	Wall height			Stainless Steel Sockets	Non-Stainless Sockets	Non-Stainless Sockets	Rubber Crumb	Grass Matting
	1.5 metres (Infants)	2.0 metres (Young Juniors)	2.5 metres (Juniors)					
1 metre	£800	£1,000	£1,200.00	£730	£584	£540	£310	£100
